PROFESSIONAL SUMMARY

I am a researcher and data scientist drawn to multidisciplinary challenges, a path that took me from Biomedical Engineering to a PhD in Machine Learning, specializing in Deep Learning for medical imaging such as stroke, cardiac MR, and brain tumour segmentation. At heart I remain an individual contributor: I like to read and follow the literature, prototype ideas, and turn technology into real clinical applications.

PROFESSIONAL EXPERIENCE

Senior AI Research

iLoF

Jan 2026 — Ongoing · Portugal · Hybrid

- Contribute to research and development of ML-based frameworks for classification of RAMAN and FTIR spectra.
- Mentoring a brief team of data scientists, fostering innovation and collaboration.

Head of AI

AI4MedImaging

Oct 2024 — Dec 2025 · Portugal · Hybrid

- Lead research and product teams, defining critical features and driving innovation.
- Propose and oversee new research initiatives and product enhancements.
- Remain hands-on, contributing to the development and implementation of AI models.

Senior Data Scientist

AI4MedImaging

Feb 2022 — Oct 2024 · Portugal · Hybrid

- Researched and developed AI-driven solutions focused on deep learning for segmentation and classification tasks, aligned with user requirements.

Data Scientist

DTx CoLab

Mar 2020 — Jan 2022 · Guimarães, Portugal

- End-to-end machine learning solutions, pipelines, and software packages, focused on anomaly detection, computer vision, and time-series analysis for industry stakeholders.

Invited Assistant Professor

University of Minho

Sep 2018 — Ongoing · Braga, Portugal

- SEIMR (TP)
- Signal Processing (TP)
- Level 1 Electronics (Lab)

EDUCATION

Doctor of Philosophy

Informatics MAP-i

2015 — 2020

Research Internship

ISTB — University of Bern

Oct 2016 — Mar 2017 · Bern, Switzerland

Biomedical Engineering

Medical Electronics Branch

2010 — 2015 · University of Minho, Braga
